

# SPECIFICATION SHEET

The L12 is our entry level plug and play Foamstream system. Operator driven, it relies on the operator to run it, rather than Weedingtech's proprietary Foamstream Software System (unlike the M600 & M1200). With a rapid start-up time of 30-60 seconds the machine has unlimited trigger time and is very easy to use. Its diesel and petrol dual-fuel source powers its 12 litres per minute flow rate, matching that of our M1200 system. Its robust design is frame mounted with four fork-lift points and can be used on a variety of different vehicles. The L12 includes additional functionality for street cleaning and a new rinse-mode feature providing the operator with an option to use the machine with just water and no foam at high or low pressure.
